Security Breach Prevention and Management Policy

Contents:

Statement of intent

The Westbrook Trust is committed to maintaining the confidentiality of its information and ensuring that the details of the finances, operations and individuals within the Trust are only accessible by the appropriate individuals. It is therefore important to uphold high standards of security, take suitable precautions, and to have systems and procedures in place that support this.

The Trust recognises, however, that breaches in security can occur, particularly as the majority of information is stored online or on electronic devices which are increasingly vulnerable to cyber-attacks. This being the case, it is necessary to have a contingency plan containing procedures to minimise the potential negative impacts of any security breach, to alert the relevant authorities, and to take steps to help prevent a repeat occurrence.

For the purposes of this policy, the title of 'data controller' will be used in reference to the person(s) primarily responsible for the handling and protection of information and data within the Trust and its schools.

1. Legal framework

1.1. This policy has due regard to statutory legislation and regulations including, but not limited to, the following:

- The Data Protection Act 1998

- The Computer Misuse Act 1990

- The General Data Protection Regulation (GDPR)

1.2. This policy has due regard to the Trust's policies and procedures including, but not limited to, the following:

- **E-Safety Policy**

- **GDPR Policy**

2. Types of security breach and causes

2.1. **Unauthorised use without damage to data** – involves unauthorised persons accessing data on the Trust systems, e.g. 'hackers', who may read the data or copy it, but who do not actually damage the data in terms of altering or deleting it.

2.2. **Unauthorised removal of data** – involves an authorised person accessing data, who removes the data to pass it on to another person who is not authorised to view it, e.g. a staff member with authorised access who passes the data on to a friend without authorised access – this is also known as data theft. The data may be forwarded or deleted altogether.

2.3. **Damage to physical systems** – involves damage to the hardware in the Trust's ICT system, which may result in data being inaccessible to the Trust and/or becoming accessible to unauthorised persons.

2.4. **Unauthorised damage to data** – involves an unauthorised person causing damage to data, either by altering or deleting it. Data may also be damaged by a virus attack, rather than a specific individual.

2.5. Breaches in security may be caused as a result of actions by individuals, which may be accidental, malicious or the result of negligence – these can include:

- Accidental breaches, e.g. as a result of insufficient training for staff, so they are unaware of the procedures to follow.

- Malicious breaches, e.g. as a result of a hacker wishing to cause damage to the Trust through accessing and altering, sharing or removing data.

- Negligence, e.g. as a result of an employee that is aware of Trust policies and procedures, but disregards these.

2.6.   Breaches in security may also be caused as a result of system issues, which could involve incorrect installation, configuration problems or an operational error – these can include:

- Incorrect installation of anti-virus software and/or use of software which is not the most up-to-date version, meaning the Trust software is more vulnerable to a virus

- Incorrect firewall settings are applied, e.g. access to the Trust network, meaning individuals other than those required could access the system

- Confusion between backup copies of data, meaning the most recent data could be overwritten

3. Roles and responsibilities

3.1.   The headteacher of each school within the Trust is responsible for implementing effective strategies for the management of risks posed by internet use, and to keep its network services, data and users secure.

3.2.   The IT support provider is responsible for the overall monitoring and management of data security.

3.3.   The headteacher of each school within the Trust is responsible for establishing a procedure for managing and logging incidents.

3.4.   The governing body is responsible for holding regular meetings with the headteacher to discuss the effectiveness of data security, and to review incident logs.

3.5.   All members of staff and pupils are responsible for adhering to the processes outlined in this policy, alongside the Trust's E-Safety Policy.

4. Secure configuration

4.1.   An inventory will be kept of all IT hardware and software currently in use at the Trust, including mobile phones and other personal devices provided by the Trust. This will be stored in each school office and will be audited on a yearly basis to ensure it is up-to-date.

4.2.   Any changes to the IT hardware or software will be documented using the inventory, and will be authorised by the IT support provider before use.

4.3.   All systems will be audited on a weekly basis to ensure the software is up-to-date. Any new versions of software or new security patches will be added to systems, ensuring that they do not affect network security, and will be recorded on the inventory.

4.4.   Any software that is out-of-date or reaches its 'end of life' will be removed from systems, i.e. when suppliers end their support for outdated products such that any security issues will not be rectified.

4.5. All hardware, software and operating systems will require passwords for individual users before use. Automated notification of password change will be sent to staff every 90 days to prevent access to facilities which could compromise network security.

4.6. The Trust believes that locking down hardware, such as through the use of strong passwords, is an effective way to prevent access to facilities by unauthorised users.

5. Network security

5.1. The Trust will employ firewalls within each of its schools in order to prevent unauthorised access to the systems.

5.2. Each school's firewall will be deployed as a:

- **Centralised deployment**: the broadband service connects to a firewall that is located within a data centre or other major network location.

5.3. As each school's firewall is managed locally by an approved third party, the firewall management service will be thoroughly investigated by the IT support provider to ensure that:

- Any changes and updates that are logged by authorised users within each school are undertaken efficiently by the provider to maintain operational effectiveness.

- Patches and fixes are applied quickly to ensure that the network security is not compromised.

6. Malware prevention

6.1. The Trust understands that malware can be damaging for network security and may enter the network through a variety of means, such as email attachments, social media, malicious websites or removable media controls.

6.2. The IT support provider will ensure that all Trust devices have secure malware protection and undergo regular malware scans.

6.3. Malware protection is updated automatically to ensure it is up-to-date and can react to changing threats.

6.4. Malware protection will also be updated in the event of any attacks to the Trust's hardware and software.

6.5. Filtering of websites, as detailed in section 7 of this policy, will ensure that access to websites with known malware is blocked immediately and reported to the IT support provider.

6.6. The Trust and its schools will use mail security technology, which will detect and block any malware that is transmitted by email. This will also detect any spam or other messages which are designed to exploit users.

6.7. The IT support provider will regularly review the mail security technology to ensure it is kept up-to-date and effective.

7. User privileges

7.1. The Trust understands that controlling what users have access to is important for promoting network security. User privileges will be differentiated, i.e. pupils will have different access to data and the network than members of staff.

7.2. The headteacher will clearly define what users have access to and will communicate this to the IT support provider, ensuring that a written record is kept.

7.3. The IT support provider will ensure that user accounts are set up to allow users access to the facilities required, in line with the headteacher's instructions, whilst minimising the potential for deliberate or accidental attacks on the network.

7.4. The IT support provider will ensure that websites are filtered on a regular basis for inappropriate and malicious content. Any member of staff or pupil that has accessed inappropriate or malicious content will be recorded in accordance with the monitoring process in section 12 of this policy.

7.5. All users will be required to change their passwords every 90 days and must use upper and lowercase letters, as well as numbers, to ensure that passwords are strong. Users will also be required to change their password if they become known to other individuals.

7.6. Pupils are responsible for remembering their passwords; however, the IT support provider will have an up-to-date record of all usernames and passwords, and will be able to reset them if necessary.

7.7. Pupils in KS1 will not have individual logins, and class logins will be used instead. If it is appropriate for a pupil to have an individual login, the IT support provider will set up their individual user account, ensuring appropriate access and that their username and password is recorded.

7.8. The 'master user' password used by the IT support provider will be made available to the headteacher, or any other nominated senior leader, and will be kept in each school's office.

7.9. A multi-user account will be created for visitors to any of the schools within the Trust, such as volunteers, and access will be filtered as per the headteacher's instructions. Usernames and passwords for this account will be changed on a regular basis, and will be provided as required.

7.10. Automated user provisioning systems will be employed in order to automatically delete inactive users or users who have left the school. The IT support provider will manage this provision to ensure that all users that should be deleted are, and that they do not have access to the system.

7.11. The IT support provider will review the system regularly basis to ensure the system is working at the required level.

8. Monitoring usage

8.1. Monitoring user activity is important for the early detection of attacks and incidents, as well as inappropriate usage by pupils or staff.

8.2. Each school will inform all pupils and staff that their usage will be monitored, in accordance with the Trust's E-Safety Policy.

8.3. If a user accesses inappropriate content or a threat is detected, an alert will be sent to the IT support provider. Alerts will also be sent for unauthorised and accidental usage.

8.4. Alerts will identify: the user, the activity that prompted the alert and the information or service the user was attempting to access.

8.5. The IT support provider will record any alerts using an incident log and will report this to the headteacher. All incidents will be responded to in accordance with section 12 of this policy, and as outlined in the E-Safety Policy.

8.6. All data gathered by monitoring usage will be stored securely for easy access when required. This data may be used as a method of evidence for supporting a not yet discovered breach of network security. In addition, the data may be used to ensure the Trust is protected and all software is up-to-date.

9. Removable media controls and home working

9.1. The Trust understands that pupils and staff may need to access the Trust network from areas other than on the premises. Effective security management will be established to prevent access to, or leakage of, data, as well as any possible risk of malware.

9.2. The IT support provider will encrypt all Trust-owned devices for personal use, such as laptops, USB sticks, mobile phones and tablets, to ensure that they are password protected. If any portable devices are lost, this will prevent unauthorised access to personal data.

9.3. Pupils and staff are not permitted to use their personal devices where the Trust shall provide alternatives, such as work laptops, tablets and USB sticks, unless specific procedures are agreed and in place.

9.4. If pupils and staff are instructed that they are able to use their personal devices, they will ensure that they have an appropriate level of security and firewall to prevent any compromise of the school/Trust's network security. This will be checked by the data controller.

9.5. When using laptops, tablets and other portable devices, the headteacher will determine the limitations for access to the network, as described in section 5 of this policy.

9.6. Staff who use Trust-owned laptops, tablets and other portable devices will use them for work purposes only, whether on or off Trust premises.

9.7. The IT support provider will use encryption to filter the use of websites on these devices, in order to prevent inappropriate use and external threats which may compromise network security when bringing the device back onto the premises.

9.8. All data will be held on systems centrally in order to reduce the need for the creation of multiple copies, and/or the need to transfer data using removable media controls.

9.9. The Wi-Fi network at each school within the Trust will be password protected and will only be given out as required. Staff and pupils are not permitted to use the Wi-Fi for their personal devices, such as mobile phones or tablets, unless instructed otherwise by the headteacher.

9.10. A separate Wi-Fi network will be established for visitors at each school to limit their access to printers, shared storage areas and any other applications which are not necessary.

10. Backing-up data

10.1. The IT support provider performs a back-up of all electronic data held by each school on a daily basis, and the date of the back-up is recorded using a log. Each back-up is retained for two months before being deleted.

10.2. The IT support provider performs an incremental back-up on a weekly basis of any data that has changed since the previous back-up. The IT support provider will record the date of any incremental back-up, alongside a list of the files that have been included in the back-up.

10.3. Where possible, back-ups are run overnight and are completed before the beginning of the next school day.

10.4. Upon completion of back-ups, data is stored on each school's hardware which is password protected.

10.5. Only authorised personnel are able to access the Trust's data.

11. User training and awareness

11.1.   The headteacher will arrange training for pupils and staff on an annual basis to ensure they are aware of how to use the network appropriately in accordance with the E-Safety Policy.

11.2.   Training for all staff members will be arranged by the head teacher within two weeks following an attack or significant update.

11.3.   Through training, all pupils and staff will be aware of who they should inform first in the event that they suspect a security breach, and who they should inform if they suspect someone else is using their passwords.

11.4.   All staff will receive training as part of their induction programme, as well as any new pupils that join each school.

11.5.   All users will be made aware of the disciplinary procedures for the misuse of the network leading to malicious attacks, in accordance with the process detailed in the E-Safety Policy.

12.   Security breach incidents

12.1.   Any individual that discovers a security data breach will report this immediately to the headteacher of the school.

12.2.   When an incident is raised, the headteacher will inform the Data Protection Officer (DPO) who will record the following information:

- Name of the individual who has raised the incident
- Description of the incident
- Description of any perceived impact
- Description and identification codes of any devices involved, e.g. Trust-owned laptop
- Location of the equipment involved
- Contact details for the individual who discovered the incident

12.3.   The DPO will take the lead in investigating the breach, and will be allocated the appropriate time and resources to conduct this.

12.4.   The DPO, as quickly as reasonably possible, will ascertain the severity of the breach and determine if any personal data is involved or compromised.

12.5.   The DPO will oversee a full investigation and produce a comprehensive report.

12.6.   The cause of the breach, and whether or not it has been contained, will be identified – ensuring that the possibility of further loss/jeopardising of data is eliminated or restricted as much as possible.

12.7.   If the DPO determines that the severity of the security breach is low, the incident will be managed in accordance with the following procedures:

- In the event of an internal breach, the incident is recorded using an incident log, and by identifying the user and the website or service they were trying to access.

- The headteacher will issue disciplinary sanctions to the pupil or member of staff, in accordance with the processes outlined in the E-safety Policy.

12.8. Any further action which could be taken to recover lost or damaged data will be identified – this includes the physical recovery of data, as well as the use of back-ups.

12.9. Where the security risk is high, the Trust will establish what steps need to be taken to prevent further data loss which will require support from various Trust departments and staff. This action will include:

- Informing relevant staff of their roles and responsibilities in areas of the containment process.
- Taking systems offline.
- Retrieving any lost, stolen or otherwise unaccounted for data.
- Restricting access to systems entirely or to a small group.
- Backing up all existing data and storing it in a safe location.
- Reviewing basic security, including:
  - Changing passwords and login details on electronic equipment.
  - Ensuring access to places where electronic or hard data is kept is monitored and requires authorisation.

12.10. Where appropriate, e.g. if offences have been committed under the Computer Misuse Act 1990, the IT support Provider will inform the police of the security breach.

12.11. The IT support provider will test all systems to ensure they are functioning normally, and the incident will only be deemed 'resolved' when it has been assured that the Trust's systems are safe to use.

13. Assessment of risks

13.1. The following questions will be considered by the DPO in order to fully and effectively assess the risks that the security breach has brought, and to help take the next appropriate steps. All relevant questions will be clearly and fully answered in the data controller's report and records:

- What type and how much data is involved?

- How sensitive is the data? Sensitive data is defined in the Data Protection Act 1998; some data is sensitive because of its very personal nature (e.g. health records) while other data types are sensitive because of what might happen if it is misused (e.g. bank account details).

- Is it possible to identify what has happened to the data – has it been lost, stolen, deleted or tampered with?

- If the data has been lost or stolen, were there any protective measures in place to prevent this, such as data and device encryption?

- If the data has been compromised, have there been effective measures in place that have mitigated the impact of this, such as the creation of back-up tapes and spare copies?

- Has individuals' personal data been compromised – how many individuals are affected?

- Who are these individuals – are they pupils, staff, governors, volunteers, stakeholders, suppliers?

- Could their information be misused or manipulated in any way?

- Could harm come to individuals? This could include risks to the following:
  - Physical safety
  - Emotional wellbeing
  - Reputation
  - Finances
  - Identity
  - Private affairs becoming public

- Are there further implications beyond the risks to individuals? Is there a risk of loss of public confidence/damage to the Trust's reputation, or risk to the Trust's operations?

- Who could help or advise the Trust on the breach? Could Local Authority, external partners, authorities, or others provide effective support?

13.2. In the event that the DPO, or other persons involved in assessing the risks to the Trust, are not confident in the risk assessment, they will seek advice from the Information Commissioner's Office (ICO).

14. Consideration of further notification

14.1. The Trust will consider whether there are any legal, contractual or regulatory requirements to notify individuals or organisations that may be affected or who will have an interest in security (see 14.8 onwards for specific GDPR requirements about personal data).

14.2. The Trust will decide whether notification will help the Trust meet its security obligations under the seventh data protection principle.

14.3. The Trust will assess whether notification could help the individual(s) affected, and whether individuals could act on the information provided to mitigate risks, e.g. by cancelling a credit card or changing a password.

14.4. If a large number of people are affected, or there are very serious consequences, the ICO will be informed.

14.5. The Trust will consider who to notify, what to tell them and how they will communicate the message, which may include:

- A description of how and when the breach occurred and what data was involved. Details of what has already been done to respond to the risks posed by the breach will be included.

- Specific and clear advice on the steps they can take to protect themselves, and what the school is willing to do to help them.

- A way in which they can contact the school for further information or to ask questions about what has occurred.

14.6. The Trust will consult the ICO for guidance on when and how to notify them about breaches.

14.7. The Trust will consider, as necessary, the need to notify any third parties – police, insurers, professional bodies, funders, trade unions, website/system owners, banks/credit card companies – who can assist in helping or mitigating the impact on individuals.

Under the GDPR, the following steps will be taken if a breach of personal data occurs:

14.8. The Trust will notify the ICO within 72 hours of a breach where it is likely to result in a risk to the rights and freedoms of individuals.

14.9. Where a breach is likely to result in significant risk to the rights and freedoms of individuals, the Trust will notify those concerned directly with the breach.

14.10. Where the breach compromises personal information, the notification will contain:

- The nature of the personal data breach including, where possible:

  - The type(s), e.g. staff, pupils or governors, and approximate number of individuals concerned.

  - The type(s) and approximate number of personal data records concerned.

- The name and contact details of the DPO or other person(s) responsible for handling the Trust's information.

- A description of the likely consequences of the personal data breach.

- A description of the measures taken, or proposed, to deal with and contain the breach and, where appropriate, of the measures taken to mitigate any possible adverse effects.

15. Evaluation and response

15.1. The DPO will establish the root of the breach, and where any present or future risks lie.

15.2. The DPO will consider the data and contexts involved.

15.3. The DPO and headteacher will identify any weak points in existing security measures and procedures.

15.4. The DPO and headteacher will identify any weak points in levels of security awareness and training.

15.5. The DPO will report on findings and, with the approval of the Trust's leadership team, implement the recommendations of the report after analysis and discussion.

16. Monitoring and review

16.1. This policy will be reviewed by the Trustees, in conjunction with the DPO, every two years.

16.2. The DPO is responsible for monitoring the effectiveness of this policy, amending necessary procedures and communicating any changes to staff members.

	An initial impact assessment under the school's Single Equality Scheme has been carried out for this policy
A	Positive impact is explicitly intended and very likely
B	An adverse impact is unlikely, and on the contrary the policy has the clear potential to have a positive impact by reducing and removing barriers and inequalities that currently exist
C	An adverse impact is unlikely. On the contrary there is potential to reduce barriers and inequalities that currently exist. There is insufficient evidence, however, for this assessment to be made with as much confidence as is desirable
D	Adverse impact is probable or certain, since certain groups will be disadvantaged, either proportionately or absolutely, or both. Remedial action is therefore necessary
E	Adverse impact is probable or certain for certain groups but the policy as a whole can nevertheless be justified. PLEASE NOTE: Selecting this assessments will necessitate the need for legal advice

Version	1.0
